PROJECT PROFILE

# MARRIOT HOTEL

The Garden City Marriott in Long Island, New York was constructed by Duraframe Steel Framing Solutions. Duraframe's portion of the work was completed in 2019, and the overall project is scheduled to open spring 2020. Our light gauge wall panels were utilized throughout the building. Duraframe provided thousands of pounds of prefabricated load bearing light gauge metal framed wall panels and shipped them directly to the work-site for installation.
