PROJECT PROFILE

NY PUBLIC LIBRARY

The Mid-Manhattan New York Public Library recently added a modern addition with the help of Duraframe Steel Framing Solutions. This addition will allow public access to a rooftop space in which anyone can read, work, or relax with a beautiful view.

Over the course of 2 years, we worked collaboratively with Denis Dambreville of Beyer Blinder Belle Architects to make this project possible. Duraframe prefabricated all light gauge wall and roof panels for the NYPL addition, set to open in 2020.
